Discover Tomorrow's Breakthroughs

On **March 21-22, 2007**, **The Second Israel Innovation Summit** will take place at the Haifa International Convention Center in Israel. At this inspiring **international gathering**, **advanced technology and life sciences** leaders and thinkers for well known scientific institutes, international corporations, start-ups, emerging companies and leading VC funds from Israel and around the world, will meet on one conference platform to discuss **innovation** and explore the scientific and technological **breakthroughs** being conceived and achieved in Israel. During the conference, the following agenda will be rolled out:

- **Meet** and hear top tier experts
- **Explore** the best of Israeli innovation in 10 key fields of Entertainment, Homeland Security, Cleantech, Photonics, Information Security, Data Mining & Storage, Neurosciences, Cardiovascular Diagnostics, Immunotherapy & Cancer, and Rehabilitation & Orthopedics
- **Evaluate** promising Israeli technological ventures from start up and emerging companies
- **Learn** how to turn technological innovations into profit-driving ventures
